DETAILED ACTION

The Examiner acknowledges the response filed August 10, 2009, and November 9, 2009, wherein claims 18, 47-89, and 91 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 18, 47-89 and 91 are rejected under 35 U.S.C. 102(e) as being anticipated by Epler et al. US Patent Number 7,024,370, (“Epler”).

triggers inherently remove data/occurrences and at the same time may add occurrences, e.g. claims 18, and 55-56, 58 and 63. For example, if a time window in an analysis changes from March 1 to March 5, to March 2 to March 6 data would be removed and added. Also, gathering new patient data is equivalent to adding new occurrences, e.g. claim 18 and 63. Similarly this addition and removal of data would occur via rate maps, cluster maps, etc. Additionally weighting symptom data is inherent based on figure 6, and is further discussed in *column 10, lines 37-67, column 11, lines 1-67, and column 12, lines 1-10*, e.g. claim 57.

Regarding a display of data, see reporting generating module (450) which reports data from the analysis modules, the analyses include maps and reports described in *column 9, lines 4-31*.

Regarding a symptoms list, see *figure 6, and column 10, lines 1-14*, e.g. claim 59.

Regarding changing the sensitivity of a trigger on national threat level see *column 10, lines 37-47*, e.g. claims 67-68.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

The Applicant is invited to request an interview to discuss suggestions to find an acceptable conclusion of the prosecution for all parties.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
